## 📁 PROFESSIONAL EXPERIENCE

### Foxway 🔗

Full Stack Engineer

02/2020 – present  
Munich, Germany

Developed and implemented a comprehensive web of microsystems to enhance the management of a trade-in solution for used electronic devices, streamlining the entire process from customer trade-in to resale. This involved designing scalable architecture, automating workflows for device intake, refurbishment, and quality assurance, and implementing centralized data management to track devices.

### Hogarth Worldwide 🔗

Web Developer

12/2016 – 01/2020  
Istanbul, Turkey,  
California, USA

Part of an external team working for Apple, I contributed to localization efforts by meeting extremely precise design requirements and adhering to strict deadlines. This involved participating in workshops at Apple's California offices, collaborating with international teams, and supervising freelancers from around the world as part of the Turkish localization team.

Tools: Apache Subversion, HTML5, CSS3, Javascript

### YCEO Bilişim

Web Developer

08/2015 – 01/2017  
Istanbul, Turkey

Collaborated with a team of 15+ frontend and backend developers to create a comprehensive ecommerce platform for online merchants, featuring 30+ modules for managing stock, categories, SEO, and team and user administration.

## 📁 SIDE PROJECTS

### Corona Test Application

A Corona testing application that got used by companies such as Amazon, Google, Apple. This project was very agile due to the nature of the Corona epidemic and we have managed to create an application to test and warn people systematically. It was a team of 4 developers and I have worked in every part of the application.

Tech stack: Vue.js, Node.js, Salesforce, SASS, AWS

### Memorizer

A hobby project that I have created to learn and study anything, using custom generated tests with question types such as multiple-choice, listening and writing.

Tech stack: React, Firebase, Heroku, PostgreSQL

### Live Chat Support Module

Development of a chat support system in which admins can help multiple customers, each in their own private conversations, without losing connection or conversation while travelling between pages. Admins can also make use of shortcuts.

Tech stack: Node.js, jQuery, Webstorm, MongoDB, Sockets.io

### Webshop Integrations

Creating a system, using webshop api's, where you can sell millions of products from one single interface to many different market places, see and answer your messages and take care of orders. The main challenge of this project was to find a way to import all of the different types of XML structures given by the product providers into a unified system and manage millions of product updates efficiently.

Tools: MongoDB, C#, ClosedXML, OpenXML

## EDUCATION

### **Sakarya University**

*Bachelor in Computer Engineering*

2009 – 2014  
Sakarya, Turkey

### **Fontys University of Applied Sciences**

*Exchange Student in ICT & Software Engineering*

2012 – 2013  
Eindhoven,  
Netherlands
